- Governance, risk and compliance

PHASE 4:

Security uplift and transformation

- Security automated using AI & machine learning
- Cyber Security by Design implemented
- Cybersecurity advisory
- Technology transformation
- Cyber defence enhancements

About Stickman | Cyber Security by Design

Stickman is an Australian organisation established in 2006.

Our 'by design methodology' builds security systems customised for each organisation, transforming their approach to cyber security and ensuring their environment is secure – both now and into the future.

At Stickman, we believe cyber is human, because cyber security is a part of us. Technology is an extension of our lives which is being targeted by criminals. Our purpose is to create and maintain a safe and secure cyber world by designing the future of cyber security.
